

Postdoctoral Positions - Mammalian kidney development, homeostasis, and disease in Joo-Seop Park Lab

Northwestern University
Chicago, IL

The Park lab at Northwestern University Feinberg School of Medicine, Division of Nephrology, has multiple, immediate openings for postdoctoral researchers. The lab focuses on how stem/progenitor cells make their cell fate decisions to differentiate into specific cell types using the mouse kidney as a model system. We aim to identify transcription factors that define cell identities and elucidate how they interact with developmental signaling pathways in gene regulatory networks.

Interested applicants should email a single PDF file including (1) a cover letter describing your interest in this position and career goals (2) a CV, and (3) contact information for three references to Dr. Joo-Seop Park at jooseop.park@northwestern.edu.
